STAT/MATH 414 Introduction to Probability Theory

Instructor: John Fricks
office: Thomas 314
e-mail: fricks@stat.psu.edu
web: www.stat.psu.edu/~fricks/
office hours: Wednesday 1:00-2:30
Thursday 2:00-3:30 or by appointment

TA: Sonali Saxena
e-mail: sys5379@psu.edu

Prerequisite: MATH 230 or MATH 231
Course Webpage: http://www.stat.psu.edu/~fricks/spring2011/stat414/

Exam Schedule:
First Exam ................................................................. February 18
Second Exam ......................................................... April 1

Grading Policy: Grades will be determined by the following components:
Homework/Labs .............................................................. 30
Midterm 1 ................................................................. 20
Midterm 2 ................................................................. 20
Comprehensive Final ..................................................... 30

The final grades will be determined using the following intervals. If the grades are modified, a higher grade may be received, but you will not receive a lower grade than what is found below.

\[
\begin{align*}
[93, 100] & \quad \text{A} \\
[90, 93) & \quad \text{A-} \\
[87, 90) & \quad \text{B+} \\
[83, 87) & \quad \text{B} \\
[80, 83) & \quad \text{B-} \\
[77, 80) & \quad \text{C+} \\
[70, 77) & \quad \text{C} \\
[60, 70) & \quad \text{D} \\
[0, 60) & \quad \text{F}
\end{align*}
\]

Homework:
- Homework will be given weekly except for exam weeks.
- No late homework will be accepted under any conditions. Feel free to turn in the homework early or have a classmate turn it in if you are unable to attend class.
- Two homework grades will be dropped.
- Homework is due at the beginning of the class period.
- In order to receive credit for homework, all assignments must include HOW an answer is obtained, not just the solution.
- Feel free to discuss homework with your classmates—the work that you turn in MUST BE YOUR OWN.
- Two selected problems will be graded in detail; the others will be checked for completeness.
- Don’t overlook office hours as a great opportunity to discuss homework, both past and present. You do not need an appointment to show up to office hours; simply walk in!
Exam Policies:

- **Midterm Exams** The midterms will take place in class on Fridays and there will be no homework assignments due during weeks in which midterms occur. These exams will be closed-book and closed-notes. The second midterm will not be comprehensive; i.e., it will cover only the period of time between the two midterms. In the case of a University approved conflict, an arrangement will be made with the instructor. You must inform the instructor one week before the exam date.

- **Final Exam** The comprehensive final exam will take place at the registrar-designated time and place during the week of May 2-6. Like the midterms, it will be closed-book and closed-notes. Unlike the midterms, it will cover the entire semester and not merely the period after the second midterm. No rescheduled final exams will be allowed except for those mandated by the Penn State registrar because of conflicts. This means that you must attend the final exam and should under no circumstances make end-of-semester travel arrangements before knowing your final exam schedule.

**Integrity:**

All Penn State University and Eberly College of Science policies regarding academic integrity apply to this course. Those policies are available at: [www.science.psu.edu/academic/Integrity/index.html](http://www.science.psu.edu/academic/Integrity/index.html)

Please pay particular attention to the student conduct section from those policies:

All course work by students will be done on an individual basis unless an instructor clearly states that an alternative is acceptable. Any reference materials used in the preparation of an assignment, whether quoted or paraphrased, must be explicitly cited. In an examination setting, unless the instructor gives explicit prior instructions to the contrary, regardless of whether the examination is in-class or take-home, violations of academic integrity shall consist of any attempt to receive assistance from any person or papers or electronic devices, or of any attempt to give assistance, whether the student doing so has completed his or her own work or not. Other violations include, but are not limited to, any attempt to gain an unfair advantage in regard to an examination, such as tampering with a graded exam or claiming another’s work to be one’s own.
